

A forward looking design A fresh new taste in water

Coway's sleek new, less-is-decidedly-more, design - as clean and tasty as the water it delivers.

Advanced 3-way rotating spigot

Rotary spigot has 3 settings: Cool water / Ambient temperature water / Sparkling water

Simple and neat design of back panel

With a new design, the back panel is neat and clean without a mass of cylinder and hoses, and safety is increased by placing cylinder inside a machine.

Pretty and convenient tray

You can put cups and water bottle on the tray which increases convenience and appearance of the device.

Specifications		
Model code	CPC-08FU	
Filtration Size/ filter Life Time	Composite	Composite Filter (Activated Carbon / Ceramic Ball / Uf Filter) ※ Uf Filter:3,600L(951gal)
	Ceramic UV Lamp	UV Lamp
Tank Capacity	Ambient Water	No tank Required
	cold water	6 l
	Cabonated water	0.7 l
Filtration Capacity	25°C, 14.5psi	
	Normal : 2LPM (120L/hr) Max : 4LPM (240L / hr)	
Power Consumption	230V / 50Hz, Compressor : 115W	
Dimensions (Width X Height X Depth)	310(W) X 440(H) X 500(D)	
Net Weight	23kg	

About WOONGJIN COWAY

Made with Coway's outstanding technology, our competitive products are now popular in more than 30 countries around the world. Not only as a specialist in water filtration devices, but also as a world-class consumer electronics company, we make products that satisfy diverse needs of global consumers through ongoing research on eco-friendly home appliances.

Coway

Home-made Sparkling Water!!

COWAY SPARKLING
WATER FILTRATION DEVICE / CPC - 08FU

You know it's safe when
the source is... you.

Mineral water... spring water...
glacial water... well water...

Endless dubious sources and endless questionable claims of health benefits and natural refreshment. But whether it comes straight from a tap or an overpriced designer bottle do you really have confidence in what you are serving yourself, your family and your guests?

Now you do.
Now, thanks to the Coway CPC-08FU, you are in control.
You are the source.

The Art of Purity

It's not just clean – it's Coway clean!

To finish with the cleanest, clearest, most refreshing sparkling water possible you must start with the cleanest, clearest water possible.

That is what the CPC-08FU delivers - even with water straight from your tap. Trapping pollutants and particulates while allowing healthful minerals to pass, the compound activated charcoal filtration system produces the purest of pure water, ready to drink as is or to carbonate for that effervescent lift.

COWAY CARBONATED WATER FILTRATION DEVICE / CPC - 08FU

Vs

Sewage Disposal plant

Foreign Substances inside of 2nd Water Tank(Ca, Mg, scale etc)

Rust from pipe or foreign substances can penetrate through cracks in pipes

Tap water might contain mercury, Zinc, Cadmium, Lead, Copper, or Iron...

Expensive sparkling water VS Economical sparkling water

A 750 ml bottle of sparkling water is \$2. It will cost you \$160 to buy 60\$(80 bottles). It will cost you just \$13's worth of CO2 to make 60l of sparkling water with coway sparkling water filtration device.

Coway CPC-08 FU

Pure, refreshing water... The modern way

Combining the most stringent filtration available today with a unique, noiseless carbon injection system to produce clean, healthy traditional still or vitalizing sparkling water.

Direct Chill Cooling System

There is no holding tank in the system that might allow standing water to stagnate and lose its freshness. Instead, every drop of water dispensed is newly introduced and freshly cooled by passage over the unique ice tank.

Pumpless Carbonating System

Unlike conventional, pump-driven CO2 systems by which free gas is inefficiently absorbed by water, Coway injects water directly into a CO2 reservoir, insuring absorption and providing silent, energy efficient operation.

Timely and simple cartridge changes

When the CO2 cylinder has been depleted, the system will not dispense carbonated water, an indication that it is time to replace it - effortless and quickly accomplished via the one-touch front release mechanism.

Timely and effortless filter changes

An easily readable flow sensor eliminates guesswork about when it's time to change filters. The one-touch filter change mechanism allows fast, easy, and error-free maintenance of purity-perfect filtration... (filtering capacity of a filter is 36,000 L (951gal), 10L/Day and maximum use is for 1 year)

It's clean. It's convenient. It's efficient.

Coway Sparkling Water Filtration Device CPC-08 FU

UF compound filter protects minerals

The UF compound filter is composed of Activated Charcoal / Ceramic / UF Filter and produces healthier sparkling water by filtering contaminants while protecting precious minerals.

Post-UV additional filtration

After UV compound filtration water is subjected to additional robust UV filtration to ensure complete removal of any remnant germs or pollutants and deliver the purest possible carbonated water.

Built-in system wide safety

- If CO2 pressure exceeds 160psi, a reduction valve is triggered, cutting off further CO2 introduction until the pressure returns to standard levels.
- If pressure of carbonated water within the tank becomes too high, gas is automatically discharged.

Energy efficiency

A Cooling On/Off switch allows energy savings when ambient temperature water will suffice. When not used for an extended period, the entire unit may be switched off without any negative effects on the filtration or carbonation systems.

COLD

AMBIENT

SPARKLING

Healthy, tasty, sparkling water!

For every generation and every situation... the next generation of pure water technology: Coway.

For between meal and evening refreshment.

For flavorful, calorie-free mealtime drinks.

For calming that sometimes "iffy" stomach.

For a fun, fizzy alternative to those unhealthy sodas.
